

Filterless Extract Fan

WC, Bathroom & Kitchen Fan

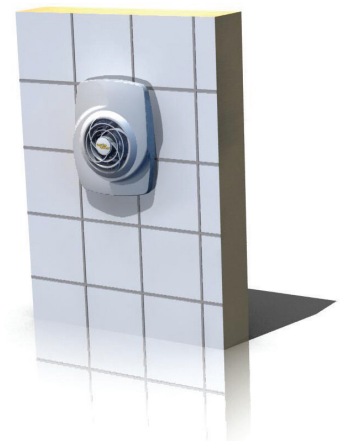

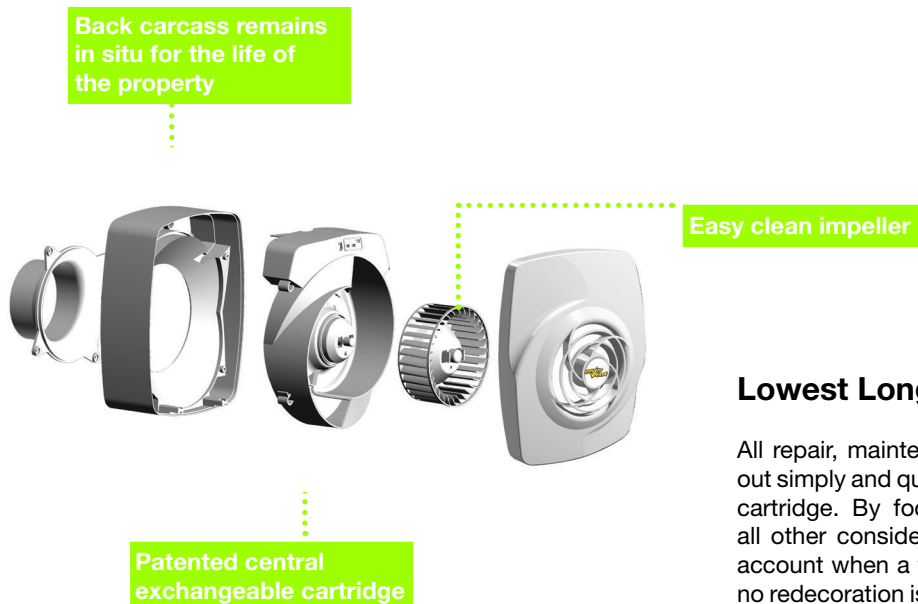

Features

- Unique patented cartridge system
- Filterless technology
- Ultra Low Watt EC motor technology
- Patented helical power expansion chamber
- SELV model available
- Maintenance free carcass
- Automatic vapour tracking function
- On going 5 year guarantee
- Made in UK

Benefits

- Fan for life
- Versatile and flexible
- Ideal for all applications (one fan fits all)
- Environmentally friendly
- Low maintenance
- Low life cycle costings
- Spectacular performance
- Designed for the life of the building
- Easy to clean
- Whisper quiet running

The EnviroVent filterless extract fan is a major advancement in extract fan technology and has been designed to deliver the lowest possible maintenance, the lowest long term life cycle costing and lowest performance/energy costs.

Lowest Long Term Life Cycle Costings

All repair, maintenance and component replacement is carried out simply and quickly by exchanging the plug out/plug in central cartridge. By focusing on this rapid, internal unit exchange, all other considerations which normally have to be taken into account when a fan is exchanged become irrelevant. There are no redecoration issues or wiring alterations and replacement can be carried out – in seconds – by non-electrically qualified staff.

This 'when necessary' cartridge exchange – with re-worked components will ensure that the basic fan installation will remain intact throughout the repair cycle of the dwelling, eliminating the wasteful disposal of plastic and other non biodegradable material to landfill sites.

Lowest Performance/Energy Costs

Using the advanced EnviroVent Ultra Low Watt Brushless EC Motor, the fan achieves exceptional levels of energy use and is up to **80% more efficient than a traditional AC fan.**

Lowest Maintenance

By 'designing out' the requirement for filtration and by ensuring a smooth uninterrupted passage of contaminated air through the fan scroll, from the dwelling to atmosphere, we are able to issue a sustainable five year, no quibble warranty. The unique protection afforded to delicate, internal components and electrical connections, together with use of the highest quality bearings are further quality measures which ensure the EnviroVent filterless extract fan will perform to specification well beyond its guarantee period.
